## Life Company Mortgages Post 2.27 Percent Return in Second Quarter 2016

BOSTON, Sept. 28, 2016 /PRNewswire/ -- Commercial mortgage loans held by life insurance companies returned 2.27 percent in second quarter 2016, a dip from first quarter's total return of 3.39 percent, according to the LifeComps Commercial Mortgage Loan Index.

Income contributed 1.17 percent and price added 1.10 percent. Price return was positive for the second consecutive quarter due to a downward shift in the treasury yield curve. The yield on the ten-year Treasury declined 29 basis points over the quarter to 1.49 percent. Overall, the change in the yield curve contributed 1.38 percent to price return while spread movement, credit migration and portfolio growth subtracted -0.28 percent.

The 12-month return jumped to 7.41 percent from 3.73 percent in first quarter as negative performance from second quarter 2015 rolled out of the calculation. Annual income was 4.94 percent while price added 2.47 percent. The price gain was primarily due to falling yields on Treasuries with terms over one-year. The yield on the 10-year Treasury fell 86 basis points over the year.

Of the four major property types, retail loans performed best for the quarter with a return of 2.36 percent compared to 2.30 percent for apartments, 2.24 percent for office, and 1.98 percent for industrial. Over twelve months, retail loans performed best at 7.74 percent followed by apartments at 7.55 percent, office at 7.46 percent and industrial at 6.26 percent.

## Commercial Mortgage Loan – Total Return by Property Type as of June 30, 2016
