

Fitch affirms Northwestern Mutual's AAA rating, the highest possible rating

MILWAUKEE, Feb. 3, 2014 /PRNewswire/ -- Fitch Ratings has affirmed the AAA insurance financial strength rating for Northwestern Mutual and Northwestern Long Term Care Insurance Company, citing the company's "leading competitive position in the U.S. individual life insurance market" among other reasons.

(Logo: <http://photos.prnewswire.com/prnh/20130206/CG55426LOGO>)

With this latest affirmation, the company continues to hold the highest financial strength ratings awarded to any life insurer by all four of the major credit rating agencies.

"Northwestern's business concentration in the sale of traditional cash value life insurance through a strong career distribution system gives the company very favorable credit characteristics (e.g., long-duration liabilities, limited guarantees, predictable earnings performance) that enhance NM's risk profile and earnings," the rating agency said in its Jan. 30 press release.

The agency also highlighted Northwestern Mutual's strong balance sheet. "Total adjusted statutory capital increased \$1.2 billion or 5 percent to \$23.1 billion in the first nine months of 2013 due to positive contributions from statutory operating earnings and investment gains."

Well positioned for environment

While all insurers have been affected by low interest rates, Fitch noted that Northwestern Mutual is well positioned for the environment.

"Fitch also believes Northwestern's stable, long-duration participating liabilities, very strong statutory capital position and flexibility in adjusting policyowner dividend rates provide cushion to withstand the current interest rate environment and unexpected losses in its investment portfolio."

If Fitch were to downgrade the United States' credit rating, the agency said Northwestern Mutual and other highly rated insurers may continue to be rated above the sovereign rating. "Fitch's opinion is that these companies are structurally shielded from foreign exchange transfer and convertibility risks, and their financial condition is sufficient to withstand a sovereign crisis."
